

General — Business Context (Ask First)

These set the foundation for everything.

1. How many properties are you currently managing in total? And how many are actively rented vs vacant right now?
100 plus
 2. How many staff members will be using this system day-to-day? What are their roles — do you have agents, admins, a manager?
2-3 users
 3. Do you operate from one office or multiple branches? No will be managed by 1 user
 4. How are you managing all of this right now — Excel, WhatsApp, physical files? We need to understand what data exists and in what format so we can plan migration.
Currently managed through excel
 5. Are you managing only apartments, or do you also handle commercial units, houses, or land?
90% of the apartments, the rest are houses, lands, and commercial properties.
 6. Do you manage rentals only, or are there properties listed for sale as well?
both
-

Module 1 — Apartment Listings Management

7. What details do you record per property unit? For example — building name, floor number, unit number, square footage, number of bedrooms, furnishing status, monthly rent amount, maintenance charge?
Apartment name, unit no., type, owner details, owner name, square footage, monthly rental, no of bedrooms, furnishing status
8. Do you need to store photos of each unit in the system, or is this purely data-based?
No, just a database
9. Each property has an owner — is it always one owner per property, or can a unit have multiple owners or be under a company?
can have more than 1 user
10. What owner information do you need to store?
Full name
phone no.
email
11. When you say "availability status" — what are the possible states a unit can be in? For example: Available, Rented, Under Maintenance, Reserved. Are there others specific to your workflow?
Rented, sold, available, temporarily unavailable (date meaning timeline)
12. Do availability dates update automatically based on the lease, or do your staff change them manually?
Renewals are kept on track. A months notice or 6 weeks prior, "system renewed in 6 months)

13. When you say "listing history" — are you referring to a log of every status change a unit has gone through (e.g., rented on X date, vacated on Y date), or something broader?
someone else rents an apartment, will be available in 3 months. "in 2 months will be available", should be able to keep a tab on apartments that are available
14. Do property owners ever log in to check their own unit status, or is this system purely internal for your staff?
No, only internal staff
15. Do you advertise these listings anywhere — a website, ikman.lk, any platform? Would you need the system to connect to or export listings anywhere?
They have listings across different websites, but their internal website focuses on the consultancy side.
-

Module 2 — Client Directory & CRM

16. When you say "clients" — does that mean tenants only, or does it also include property owners and potential leads/prospects who haven't signed yet?
the CRM should be segregated to two parts,
1. Property owners that have listings for sale, or rent (Apartment name, property name, email, phone number, type of property, how many bedrooms, square footage, unit of the apartment)
2. Inquiries by clients (name, email, number, remark)
3. Tenants details (hold this part for now)
17. What personal details do you collect from a tenant? NIC number, passport, employer, emergency contact
18. Do you require document uploads per client — for example, NIC copies, employment letters, income proof?
19. For the CRM side — do you want to track leads before they become tenants? So someone inquires about a unit, you want to log that conversation and follow up even if they haven't committed?
New apartment for sale, we should be able to
-find clients to sell the apartment
-appointed as an agent to sell
-inquiries
20. What counts as a "communication log" in your current workflow — do you need to log WhatsApp messages, phone calls, emails, in-person visits? Or just formal notes your staff write in?
No
21. Do you want the system to send messages or emails to clients directly, or is this just a log of communication that happened outside the system?

Email should be able to be sent through the system

22. Do you need follow-up reminders for your staff — for example, "call this tenant back in 3 days"?
reminders are needed
-renewals (expiry, renewal, due payments, quarterly, semi annually, annually)
-new listings
23. Can one client have multiple properties under their name?
yes
24. Do you categorise clients in any way — corporate tenants, individual tenants, VIP, problematic payers, etc.?
no
-

Module 3 — Lease & Renewal Tracking

25. What is your typical lease duration — monthly, 6 months, 1 year, 2 years? Or does it vary per property?
minimum 1 year, can be 6 months to 1 year
26. What information goes into a lease agreement? Rent amount, deposit amount, start date, end date, any special clauses?
no clauses, but the rest should add, Rent amount, deposit amount, start date, end date,
27. Is the deposit tracked separately from the rent? Do you need to track deposit refunds at the end of a lease?
28. How far in advance do you want renewal alerts? 30 days before expiry? 60 days? Do you want multiple reminders?
need 2 popups
-1,6 weeks
-2,4 weeks
29. Who receives these renewal alerts — just the staff member assigned to that property, or management as well?
the user
30. When a lease expires and is not renewed, does the unit status automatically flip to "Available" in the system, or does a staff member confirm that manually?
manually confirm
31. When a lease is renewed, do rent amounts typically change? Do you need to track rent revision history per unit?
-rent changes
-refundable contrast
32. Do you handle early terminations? If yes, what information do you need to record — termination date, penalty, reason?

no need of this part

33. Do you ever do partial month rentals or payment plans, or is it always a fixed monthly amount paid on a set date?

-no monthly rentals

-10 days before due date

34. Do you need the system to generate or print a lease agreement document, or just store the lease data?

Yes

35. Are there ever cases where one unit has a lease, and simultaneously a separate agreement with the property owner — a management agreement? Do we need to track both?

No

Module 4 — Reports & Analytics

36. What reports do you currently generate manually? Walk me through exactly what your manager or owner reviews every week or month.

will let me know

37. Who needs to see these reports — internal management, or do property owners also receive reports about their units?

the user

38. For occupancy rate — do you want that calculated per building, per area, or across your entire portfolio?

no need
